## Opis produktu

The **DMON-16SL** from **Decimator Design** (a "Lite" version of the [16S](#)) is a low cost, miniature 16 to 1 Multiviewer. The 16 SDI inputs are independent of each other, meaning you can monitor a mix of 3G/HD/SD feeds. Select from preset layouts or customise your own, depending on the number of feeds you wish to monitor. The Decimator DMON-16SL multiviewer allows you to:

- Monitor between 1 and 16 independent 3G/HD/SD-SDI feeds
- Select your output format over HDMI
- Select your output format in both Full-Screen and Multi-Viewer mode
- Fully customise your layouts with the ability to save & load
- Fixed Identifier overlay per window with individual enables, custom positioning and size
- Audio ID overlay
- Fast switching between inputs using Full-Screen scaling
- Low latency buffering for each input allowing non-synchronous inputs
- Each window is independent of the others with variable aspect ratios per window
- Auto Detect & display any format of any frame rate simultaneously
- Select any of the 16 inputs for pass-through to the HDMI output
- Control from a distance via USB on a Mac/PC app
- Control on-unit using the buttons and LCD screen
- Toggle one feed to fullscreen
